### Carbon Footprint

- All products are made using non-toxic materials and **no** VOC (Volatile Organic Compounds) are involved.
- All raw materials are UK sourced and our products are made on the premises. This results in the cutting down of the mileage that the product components travel.

### Sustained materials

By weight, the product is made from up to 97% sustained materials.

- **Boards** - made from 100% Flax which is a sustainable source. This means there is no damaging impact on the environment and the natural resources remain unaffected.

### Recyclable materials

By weight, the product is up to 5% recyclable

- **Trims** - both side and top trims are made 100% from plastic which is recyclable and widely accepted by recycling centres.
- **Packaging** – 100% plastic, widely recyclable.
